

## OFFICE 365 SURVEY RESULTS & PEER INSIGHTS

Office 365 (O365) continues to be widely adopted. As such, we set out to gain a deeper understanding of what organizations are doing to ensure a smooth transition to O365 and how they are handling user management and authentication.\*

### ADOPTION

81%

have adopted/are planning to adopt O365 in the next 12 months.

*Identity models*

Almost a **50-50 split**

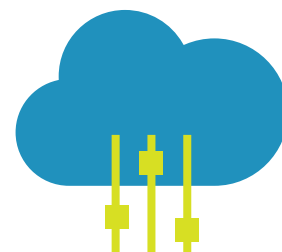

between synchronized and federated model using ADFS.

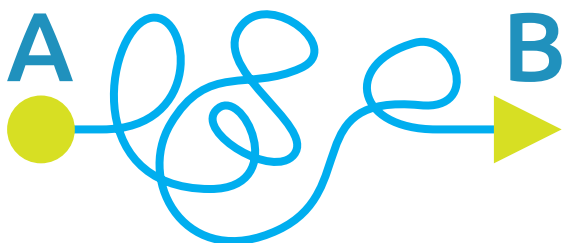

### CHALLENGES

47% Syncing users to O365 using AD Connect is difficult.

72% Find license management in O365 cumbersome.

43% Point to ADFS complexity as reason for a 3rd party SSO provider.

52% Use O365 or Azure MFA to secure login to O365 but majority are not satisfied.

\* Results based on the answers from 329 survey respondents.
